

Skorpion X5, why recommend the most powerful next-generation PDT Mobile Computer to your customers?

Unstoppable 24/7 operations, top-level productivity, efficiency and performance

1

Provide Top Reliability – Lower total cost of ownership for your customers

The Skorpion X5 is designed to withstand the harshest environments with exclusive reliable features

3

Offer the latest generation scan engines with superior data capture ability

Technology and business pace evolve fast – are your customers keeping up?

5

Offer the right tailored configuration based on customer needs

Based on the application, select most suited form-factor, scan engine, memory size, and charging technology

7

Expand your re-occurring revenues with access to complete Mobility Suite

Leverage key advantages of the most advanced software tools and services

2

Improve customer efficiencies with exceptional agility

The Skorpion X5 has a fast and dominant computational CPU power and top communication performance

4

Recommend key differentiating features that make a difference

Largest screen display, extreme ergonomic features and lightweight design add value and improve productivity

6

Effortless deployment for any business type and size

User-friendly software tools to manage a complete fleet or just a few devices are readily available

Flip page for expanded details

1 Provide Top Reliability – Lower total cost of ownership for your customers

Designed as a fully rugged device to withstand the harshest environments and mistreats. The ultra-reliable contactless charging models feature wireless charging technology providing a lower maintenance cost. Charging contacts are a top cause of mobile device failure and can be receptacles for dust accumulation and microbial growth. The Skorpion X5 wireless charging models are the only PDTs in the market with this future proof and reliable technology.

2 Improve customer efficiencies with exceptional agility

The Skorpion X5 has a fast and dominant computational CPU power, the high-performance processor allows the system to run fast and smoother. With double the memory capacity than competitive models, the Skorpion X5 has plenty of memory to run multi-apps at once. The fast and reliable communications mediums with latest Wi-Fi protocols and superior roaming increase the speed of data transfer and reduces power consumption.

3 Offer the latest generation scan engines with superior data capture ability

Featuring the latest generation scan engines specifically designed and developed by Datalogic for Skorpion X5, users can read any barcode, in any condition, whether labels are damaged or scratched, visible or covered. The snappiness felt at every scan trigger gives users the confidence and increases productivity with exceptional respond speed. Multiple high-performance scan engine options are available, for enhanced ergonomics and ease of use.

4 Recommend key differentiating features that make a difference

It features the largest, rugged, Gorilla Glass screen display in the PDT market at 4.3 inches, providing users plenty of space for the most modern applications and display of product pictures. The extremely ergonomic and lightweight design and perfectly balanced pistol grip help reduce operator fatigue. The functional keyboard design delivers enhanced tactile feel from key presses for faster data entry. In addition, the highly visible function keys serve as shortcuts for frequently used applications. The wireless charging technology in the Skorpion X5 eliminates the need of contacts which reduces maintenance costs, while the optional 'locking' feature in the wireless charging docks enhances security and accountability.

5 Offer the right tailored configuration based on customer needs

Find the right configuration based on your application needs with the possibility to choose from two (2) convertible form-factors, charging technologies, or memory configurations; and, three (3) scan engines or keyboard layouts.

6 Effortless deployment for any business type and size

Whether your customers are managing just a few devices or a complete fleet, working with an MDM or not, Datalogic has user-friendly deployment tools to help in a roll out. Applications such as Scan2Deploy Studio help to easily configure Wi-Fi setup, scanner configuration, applications install, firmware update, and more!

7 Expand your re-occurring revenues with access to complete Mobility Suite

Leverage the key advantages of our complete and advanced deployment application tools and software services. Extend the ease of deployment, management, and support services of the Skorpion X5 to your customers. Datalogic Shield is a new software service for Datalogic Android mobile computers offering 5+ years of support.
